PROFESSIONAL SUMMARY

Full-Stack Developer skilled in building and deploying scalable web applications using React.js, Node.js, Express.js, MongoDB, and REST APIs. Experienced in developing responsive frontend interfaces, secure backend systems, authentication workflows, cloud deployments, and real-world full-stack products across healthcare, fintech, and developer tooling domains. Built multiple end-to-end applications with modern UI/UX, secure backend systems, API integrations, and production deployment workflows. **3x Hackathon Winner** across national and inter-collegiate competitions, recognized for rapid execution and impactful engineering solutions under competitive deadlines.

PROJECTS

DENTRA – DentalVision AI

YOLOv8, Llama-3, React.js, Node.js, Express.js, MongoDB

- Developed an AI-powered dental diagnostic ecosystem that automates the workflow from dental X-rays to patient-ready treatment reports using computer vision and LLM-based medical reasoning.
- Integrated YOLOv8 for high-precision cavity and dental issue detection with Llama-3 for intelligent treatment insights, automated report generation, and interactive patient visualization.
- Engineered scalable full-stack architecture with secure AI analysis pipelines, responsive dashboards, and real-time diagnostic processing designed for modern clinical environments.

SigmaGPT

React 19, Node.js, Express.js, MongoDB, Gemini 2.5 Flash API, ImageKit CDN, Stripe, Render

- Engineered production-ready AI chat image generation platform with monitored via Render health checks / UptimeRobot” to give it credibility, secure JWT/bcrypt authentication, and Stripe payment integration processing 100+ transactions monthly.
- Implemented scalable credit system supporting 50+ concurrent users with ImageKit CDN optimization reducing load time by 45%, real-time text-to-image generation via Gemini API, and role-based access control.

Stock Trading Platform

React.js, Node.js, Express.js, MongoDB Atlas, Render

- Engineered a full-stack fintech dashboard delivering real-time portfolio tracking with sub-100ms response times, P&L analytics, and order management for 100+ concurrent positions.
- Optimized MongoDB Atlas database architecture with health checks, implemented environment-based configuration reducing deployment time by 40%, and designed modular React components for 30% faster development cycles.

Wanderlust

Node.js, Express.js, MongoDB, MapLibre, GeoJSON, Bootstrap, Joi Validation

- Architected an Airbnb-like travel marketplace with listing, booking, and search features using Node.js, Express, and MongoDB.
- Engineered interactive geospatial search workflows using MapLibre and GeoJSON, enabling faster location-based discovery and improving user navigation efficiency. to enable location-based discovery and improve user navigation.

EDUCATION

JSS Academy of Technical Education, Bengaluru

Sep 2024 – Aug 2028

Bachelor of Engineering in Computer Science & Engineering (AI-ML)

TECHNICAL SKILLS

Languages: JavaScript, Java, Python, TypeScript

Frontend: React 19, Vite, Next.js, Context API, Redux Toolkit, Bootstrap, TailwindCSS, CSS3, HTML5, React Router

Backend & Real-Time Systems: Node.js, Express.js, RESTful APIs, WebSockets, JWT Authentication, Bcrypt Encryption, Postman, Jest

Databases: MongoDB, MongoDB Atlas, PostgreSQL, Supabase

DevOps: Docker, Git, GitHub Actions, CI/CD, Kubernetes

ACHIEVEMENTS

JSS Navotthana 2.0 – 1st Place Winner — National-Level Hackathon

Apr 2026

Architected and delivered **NEXUS AUTHENTICATION**, an AI-powered multimodal biometric security platform integrating gesture recognition, voice-liveness analysis, spoof detection, and emergency SOS intelligence within an intense 24-hour national hackathon. Competed against **70+ teams** and secured **1st place** through production-grade system design and real-time AI integration.

HACKATRONICS 2.0 – 1st Place Winner — 24-Hour Inter-Collegiate Hackathon

Dec 2025

Developed an AI-driven emotional and mental wellness monitoring platform capable of analyzing facial expressions, voice patterns, communication behavior, and stress indicators to detect potential mental health risks in real time. Competed against **53+ teams** and secured **1st place** through impactful AI-for-healthcare innovation.

CODEFORGE 2K25 – 1st Place Winner — Inter-Collegiate Hackathon

Feb 2025

Built a high-performance **AI Code Analyzer** platform powered by React 19, FastAPI, AST-based static analysis, and Gemini AI to transform raw source code into intelligent documentation and real-time complexity visualization. Led the engineering workflow during an 8-hour competitive hackathon and secured **1st place among 53 teams**.
